List the Factors

List below the main factors that determine the degree of impairment caused by consumption of alcohol.

Identify the Type of Drug

Identify the type of drug shown in the box that causes each effect on the body listed below.

depressant	marijuana
hallucinogen	stimulant

- | | |
|-------|--|
| _____ | 1. Slows down the body’s mental and physical processes |
| _____ | 2. Reduces abilities to judge distance, time, and direction |
| _____ | 3. Causes a person to lose inhibitions |
| _____ | 4. Speeds up the body’s central nervous system |
| _____ | 5. Impairs judgement, memory, depth perception, and coordination |
| _____ | 6. Causes reflex actions of the body to slow down |
| _____ | 7. Gives feelings of energy and alertness at first |
| _____ | 8. Alters personality and causes panic |
| _____ | 9. Slows down the body’s central nervous system |
| _____ | 10. After alertness wears off, causes person to become tired quickly |

Study the Statements

Check correct or incorrect for each statement.

1. Alcohol is the most commonly used drug in our society.
2. Nearly half of those killed in alcohol-related collisions were not drinking.
3. Young drinking drivers are involved in fatal collisions at twice the rate as drivers over age 21.
4. More than half of all fatalities during holidays are alcohol related.
5. Teenage and adult drinking differ in that adults do more drinking in vehicles.
6. Most states enforce a minimum drinking age of 21.
7. The greatest hazard young people face is driving and riding with other drivers.
8. The highest rates of intoxication are found in drivers in their forties.
9. Drivers aged 16 through 20 are more likely to be alcohol-impaired than any other group.
10. One drink of alcohol does not always affect the behavior of some people.
